

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1                   **Claim 1** (currently amended) The telephone terminal  
2                   device comprising:  
3                   a temporary storage memory for temporarily storing an  
4                   inputted telephone number; and  
5                   a plurality of telephone ~~directory memories~~ directories,  
6                   each of the telephone directories having at least one  
7                   telephone directory memory, each of the telephone directory  
8                   memories storing input telephone numbers;  
9                   wherein a telephone number stored in the temporary  
10                  storage memory is registered in at least one telephone  
11                  directory memory selected from the plurality of telephone  
12                  directories after making a call.

1                   **Claim 2** (original) A telephone terminal device as  
2                   claimed in claim 1, wherein name and information related to  
3                   the telephone number registered are added thereto.

1                   **Claim 3** (original) A telephone terminal device as  
2                   claimed in claim 1, wherein data of at least one of the  
3                   telephone directories are erased automatically after passage  
4                   of a predetermined time.

1           **Claim 4** (currently amended) A telephone terminal device  
2        as claimed in claim 1, further comprising:

3            a transmitted telephone number record directory memory  
4        for storing a plurality of telephone numbers called; and  
5            a buffer directory memory, whose data are erased  
6        automatically after passage of a predetermined time;

7            wherein telephone numbers are registered in the  
8        transmitted telephone number record directory memory in the  
9        order of call, and in the case the number of the telephone  
10      numbers to be registered exceeds the number capable of being  
11      stored in the transmitted telephone number record directory  
12      memory, the telephone number of the oldest registration order  
13      or a telephone number specified by the user is displaced from  
14      the transmitted telephone number record directory memory to  
15      the buffer directory memory for reregistration.

1           **Claim 5** (original) A telephone terminal device as  
2        claimed in any of claims 1 to 4, further comprising an  
3        interface means for connection with an external memory  
4        device.

1           **Claim 6** (original) A telephone terminal device as  
2        claimed in claim 5, wherein at least one of the telephone  
3        directory memories comprises an external memory device  
4        connected with a telephone terminal device main body via the  
5        interface means.

1           **Claim 7** (original) A telephone terminal device as  
2        claimed in any of claims 1 to 4, wherein the telephone  
3        directory memory for registering the telephone number stored  
4        in the temporary storage memory after a call is selected  
5        manually from the plurality of the telephone directory  
6        memories.
